## **Catering to Student Diversity**

To support advanced and slow learners, following actions are taken:

1. Class teacher prepares the list of advanced and slow learners by taking feedback from different teachers based on participation of the students in class room discussions, performance in class tests, online quiz, Moodle courses, assignments, class room seminars, mini projects and feedbacks measure their learning abilities.
2. Mentor allotment is done by department at the beginning of academic year. Preferably, mentors shall be appointed at beginning of second year and shall continue till student passes out. For first year, mentors are appointed for one year only. Mentors are responsible to monitor progress of the advanced and slow learners. Also, they are responsible to identify reluctant students and provide basic counselling. Mentors prepare the report and submit to HOD periodically.
3. Subject teachers also identify advanced and slow learners as per the academic performance in their subjects (may include parameters like attendance, class performance, ability to solve assignment, lab performance, test performance, etc.). Subject teachers prepare report and submit to class teacher.
4. For slow learners, remedial lectures/tutorials are conducted on regular basis. This will help them to perform better in the academics.
5. To support advanced learners, they are encouraged to participate in technical teams, project competitions, hackathons and prepare for competitive examinations.

Sample list of slow and advanced learners is attached as below.

\*\*Case study of highlighted students is attached which includes every student personal and academic information, mentor mentee interaction form and outcome of strong students.

\*\*\*Also, extra efforts taken for slow learners to improve their overall performance is attached.

Engineering a better tomorrow

## Certificate of Completion

This certificate is awarded to **Raj Harindar Mourya**, from **Fr. Conceicao Rodrigues College of Engineering, Bandra Maharashtra**, for successfully completing the **Disaster Management Informatics**, conducted as a part of MOOC through the **e-Yantra Innovation Challenge (eYIC)**.

The course covered following skillset:

**Disaster Management Informatics** - which covered Disaster Management (DM) typologies, understanding aspects of DM, getting practically trained in the use of tools such as Spatial Databases, QGIS and communication technology which can be used for DM

She/He is amongst the top 30% of the participants who took the above-mentioned MOOCs.

(57) Abstract:  
 Detection of video duplication and integrity verification using blockchain technology is the proposed invention. The proposed invention implements a novel framework that allows one to manage data more efficiently by addressing the copyright, and data duplication issues over modern multimedia channels such as Facebook, YouTube, etc leveraging blockchain technology. The proposed blockchain-based framework engulfs the diverse content of every multimedia with a hash using different cryptographic hashing technologies such as perceptual hashing. Moreover, to make the entire process more secure, the proposed architecture develops a hash for every file using the Merkle Root Tree. The computed hash is then stored inside the decentralized database in order to preserve a historical audit trail.

Dear Participant,

Greetings from e-Yantra!

It is our pleasure to inform you that you have been **selected** for the e-Yantra Summer Internship Program (eYSIP-2022) under the e-Yantra project in the Department of Computer Science and Engineering, IIT Bombay.

The details of the project allotted to you are as follows:

Project Name	eYCoin
Technical Stack	Blockchain, Flask (Python web framework), Golang, Python

Note - This project will be a remote-only project. Interns will be mentored remotely through Discord.

If you would like to accept the internship offer kindly complete the following joining formalities as instructed on the eYSIP Portal

- 1. Internship Fee Payment** - You are required to pay an internship fee of ₹5,000/- in order to join the internship. Please use the "Internship Fee Payment" tab on the Portal to do so.  
The internship fee is required to be paid for the resources and mentorship e-Yantra provides during the period of eYSIP-2022. Upon the successful completion of the project allotted to you, you will be awarded an honorarium of ₹15,000 (along with internship certificate).
- 2. Non Disclosure Agreement** - Kindly use the "NDA" tab on the Portal to sign the Non-Disclosure Agreement. We urge you to read all the terms and conditions given in the NDA properly before signing it.
- 3. Internship Survey** - Please complete the internship survey (using the "Internship Survey" tab) to help us plan the internship activities better.

The internship period is scheduled from **6th June 2022 to 23rd July 2022 (7 weeks)**. The last date for the completion of joining formalities is **31st May 2022**. Failure to complete the joining formalities by the deadline will result in the withdrawal of the internship offer. Please do not hesitate to reach out to us at [aysip@e-yantra.org](mailto:aysip@e-yantra.org) if you have any doubts or queries.

Thanks and Regards  
e-Yantra Team

# Intern Evaluation

The aim of this project was to develop a blockchain-based crypto-currency. This new cryptocurrency will be used across e-Yantra's platform as a reward program. Glenn along with his teammate completed the required tasks and gained knowledge of the following concepts:

1. De-centralized systems
2. Blockchain technology
3. Golang
4. Web 3.0

### Theme: *Sentinel Drone*

---

**Theme Description:** In this theme, the teams learn to manipulate drones wirelessly, leverage them for automating surveillance tasks, using methodologies like image processing and uploading data to GIS (Geographic Information Systems) systems. They first work on these tasks in simulation to hone skills, and finally learn to assemble a Nano drone and execute the same tasks on hardware!

**Theme Learning:** *Robot Operating System (ROS), Drone Gazebo, OpenCV, Git, Geographic Information System (GIS)*

**Team Learning:** The team has been awarded **Level 3** in the e-Yantra Robotics Competition (eYRC).

*This level indicates that the team was able to show a fair understanding of the problem statement by implementing a partial solution of the problem statement*

Branch & Course	ECS	Department	ECS
Semester & Division	III	Subject Code	ECS305

### 2. Techniques for Identifying Slow Learners

Following techniques have been used by the undersigned to identify slow learners (students) for the subject of \_\_\_\_\_

- Attendance & overall observation in theory lectures
- Performance in Laboratory work
- Performance in both the unit test - I & II
- Ability to answer in logical manner pertaining to question asked

### 3. Slow Learners Identified

Roll / ID No.	Name of Students
9518	Zaheer Amir.
9510	Ashwin Shukla

Q1) ER Diagram

07M

Draw a neat ER diagram for Library management system. Library maintains Books along with title, author, publisher and price information. Every book has a unique bar code. Students may issue or return books as an when needed. The library maintains the issue\_date and due\_date for each student when he/she issues a book. The fine is calculated when the student returns the book. Student information such as stud\_id, name, phone number and email has been stored. Staff may request for purchase of new books. Library purchase requested book from supplier. Suppliers information like Supplier ID, supplier name and contact and email has been maintained. Clearly show all attributes, primary keys, weak entities if any and cardinality mappings (i.e. 1:1, 1:n etc). Assume necessary data.

OR

A publisher company publishes Books. The Book is characterized by BookID, Title , no\_of\_pages and Price. The Books are written by Authors. Database stores AuthorID, Author\_name, Author\_acct\_no and subject\_specialization. One author may have specialization in multiple subjects. The company employs Editors, each takes sole responsibility for editing one or more Books. Editors are identified by Editor\_ID. One book is edited by only one Editor. Every book requires some items for publication. These items are supplied by the Supplier. One supplier can supply many items. Books are purchased by Shop\_Owner. A shop\_owner may purchase many books form the publisher but one book can be sold to only one Shop\_Owner. Company keeps records for the number of copies of each book sold to the shop\_owner. Draw a neat ER – Diagram. Also show cardinality constraint on each relationship. Assume necessary data.

5) Consider a direct mapped cache of size 512 KB with block size 1 KB. There are 7 bits in the tag. Find-

1. Size of main memory
2. Tag directory size

**Solution-**

Given-

- Cache memory size = 512 KB
- Block size = Frame size = Line size = 1 KB
- Number of bits in tag = 7 bits

We consider that the memory is byte addressable.

### Number of Bits in Block Offset-

We have,

Block size

= 1 KB

=  $2^{10}$  bytes

Thus, Number of bits in block offset = 10 bits

### Number of Bits in Line Number-

Total number of lines in cache

= Cache size / Line size

= 512 KB / 1 KB

=  $2^9$  lines

Thus, Number of bits in line number = 9 bits

## Remedial Lecture Report

Weak students were identified through different tools like poor performance in Unit test, Lab etc.

These students were informed about the remedial class scheduled for them. The notice about remedial class was displayed.

One remedial lecture was conducted on 09/11/2022 from 9.00 am to 11.15 am.

### Topics covered in remedial lecture:

1. What is hashing? Hashing techniques, collision resolution techniques with examples.
2. Problems on hashing.
3. Binary Search Tree, AVL tree. Problems on AVL tree.
4. Graph traversal methods, DFs and BFS.

After remedial lecture a test was conducted based on topics covered in the class.

Attendance and Feedback was taken from the students.

Students appreciated as important topics were revised and practice was taken on problem solving which helped them to write the test.

REMEDIAL ASSIGNMENT QUESTIONSSUBJECT : DBMS

- 1) Explain 1NF with example.
- 2) Explain 2NF with example.
- 3) Explain 3NF with example.
- 4) Explain with example partial and full functional dependency.
- 5) Explain transitive functional dependency with example.
- 6) R(A,B,C,D,E,F)

FD-{C->F,E->A,EC->D,A->B}

Find the candidate key and convert relation R in 3NF.

- 7) R(A,B,C,D)

FD{A->B, B->C, C->D}

Find the candidate key and convert relation R in 3NF

- 8) Explain ACID (Atomicity, Consistency, Isolation and Durability) properties for transaction.
- 9) Write SQL queries for following Questions.

Employee\_table

ID	Name	Dept_name	age	Salary
1	Ramesh	Marketing	35	20000
2	Ram	Finance	25	15000
3	Kaushik	Accounts	23	25000
4	Chaitali	Finance	25	65000
5	Hardik	Accounts	27	85000
6	Komal	Marketing	22	45000
7	John	Finance	24	100000

1. Write a query to create Employee\_table.
2. Insert new tuple in Employee\_table.
3. Retrieve the entire contents of names and Dept\_name of all employees.
4. List all employee of accounts department.
5. Change age=25 for ID= 7.
6. Delete all employees whose department is Marketing.
7. Retrieve the name of all employee whose salary is above 45000. (Write a query using nested subquery)
8. Find maximum salary for each department.

## 1. Course & Subject Details

Academic Year	2022-23	Subject Name	Artificial Intelligence
Branch & Course	TE AI & DS	Department	AI & DS
Semester & Division	V	Subject Code	CSC503

## 2. Techniques for Identifying Slow Learners

Following techniques have been used by the undersigned to identify slow learners (students) for the subject of Web Technologies

- Attendance & overall observation in theory lectures
- Performance in Laboratory work
- Performance in both the unit test – I & II
- Ability to answer in logical manner pertaining to question asked

## 3. Slow Learners Identified

Roll / ID No.	Name of Students
9377	Jonathan Joseph
9411	Jace Tuscano

## 4. Observations & Remedial Action

Remedial classes were planned for the weak student based on Attendance and Unit Test marks. Those who could not fulfill the set criteria are called for remedial classes. Students were asked to choose the topics they feel critical from understanding and exam point of view.

Name	Roll Number	Reason for remedial class
Jonathan Joseph	9377	Failed in Unit tests.
Jace Tuscano	9411	Failed in both the tests and could not perform lab work experiments
